

Amendments to Specification

Please replace the first full paragraph on page 6, line 6 of the original specification as follows:

Fig. 1 schematically illustrates a Model 750 no till grain drill 10 manufactured by the John Deere Company. The grain drill 10 is comprised of a rigid frame 12 having a plurality of wheels 14 for supporting the drill during rolling over a surface of ground to be the grain to be planted in the ground. The grain drill has a no till planting mechanism 17 which is comprised of a plurality of no till planting units 19 which extend away from the grain hopper 16 to the ground as illustrated in Figs. 1 and 3. The planting mechanism 17 receives seeds from the grain hopper 16 and conveys the seeds to the no till planting units 19 which bury the seeds below the ground in a known manner.
